PROFESSIONAL SUMMARY

Versatile Full-Stack Software Engineer with 4 years of hands-on experience designing, deploying, and scaling automated web infrastructures, multi-tenant SaaS architectures, and agentic AI tools. Combines deep technical proficiency in the TypeScript/Next.js ecosystem with formal academic training in Software Engineering to deliver production-grade, highly secure software solutions.

TECHNICAL ECOSYSTEM

- **Languages:** TypeScript, JavaScript, Python, Go (Golang)
- **Frontend Engineering:** React, Next.js, Tailwind CSS, Redux, Mobile-Responsive UI/UX Design
- **Backend & Systems:** Node.js, Express, PostgreSQL, Prisma ORM, MongoDB, REST APIs
- **DevOps & Cloud:** Docker, AWS, Google Cloud Platform (GCP), Git, GitHub Actions
- **AI & Automation:** OpenAI API, LangChain, FastAPI

CORE PRODUCTION BUILDS & PROJECTS

Kinetix (Lead Engineer)

Automated Multi-Tenant SaaS E-Commerce Platform * Architected a highly scalable, mobile-responsive multi-tenant e-commerce engine using **Next.js**, **TypeScript**, and **Tailwind CSS**.

- Designed a secure relational database architecture utilizing **PostgreSQL** and **Prisma ORM** to manage isolated client storefront configurations.
- Integrated **Paystack API** gateways, configuring complex payment initialization pipelines and automated dynamic transaction fee calculations.

Agentic (Core Developer)

Agentic AI Ecosystem & Automation Workspace * Built an automation engine utilizing **FastAPI**, **LangChain**, and **OpenAI API** to orchestrate independent LLM agent protocols.

- Engineered a minimal, high-speed streaming response interface over WebSockets for low-latency operational data feedback.

Giftech Stores (Full-Stack Engineer)

Standalone E-Commerce Infrastructure * Developed a premium retail application using **Node.js** and **React** with fully optimized checkout pipelines and stateful variant forms.

PROFESSIONAL EXPERIENCE

Full-Stack Software Engineer | *Self-Employed / Freelance* **September 2025 – Present** *

Architect and scale production-ready multi-tenant SaaS architectures, complex database schemas, and AI-driven workflow engines for independent ventures.

- Design and implement secure API integrations, payment gateway infrastructures, and highly responsive user interfaces across projects like Kinetix and Agentic.
- Optimize application runtime performance, manage end-to-end cloud deployments, and execute comprehensive product-to-market release strategies.

Website Developer | *Jobeny Tech* **June 2024 – September 2025** * Developed

high-performance, mobile-responsive business websites tailored explicitly to custom, client-facing parameters.

- Implemented secure third-party ecosystems, custom data management portals, and unified payment processing API routes.
- Refactored core legacy assets to elevate SEO visibility, maximize lighthouse performance metrics, and refine user experience indicators.

Software Engineering Intern | *AGM Techpluse* **December 2023 – June 2024** * Assisted in

building and maintaining enterprise web applications utilizing robust modern JavaScript frameworks and TypeScript.

- Collaborated with cross-functional development teams to build, test, and deploy highly scalable backend microservices.
- Diagnosed structural bottlenecks, optimizing frontend and backend codebases to maximize runtime responsiveness and execution performance.

EDUCATION

B.Sc. Software Engineering *Faculty of Computing, Department of Software Engineering*

Expected Graduation: 2028 (or applicable graduation year)

- **Relevant Coursework:** Computer Architecture (IFT 212), Data Structures and Algorithms, Database Systems Management, Object-Oriented Programming.

COMPETITIONS & ENGAGEMENTS

Participant | *OPay Innovation Challenge* * Developed and submitted a scalable fintech solution proposal tailored to cross-platform runtime reliability and secure ledger distribution.

- Defended architectural designs addressing rapid transaction volume scaling constraints under high-stress network environments.

Brand & Growth Architecture | *Giftech Stores Product Launch* * Established a strategic organic company page presence on LinkedIn to act as an investor portfolio engine.

- Formulated and executed a structured 30-day cross-platform MVP marketing campaign to gather initial metric arrays and user performance logs.
